Project sharing

introduction

- 01** **Basic project**
How to share a project in **read-only mode**?
- 02** **Expert project**
How to share my project with restrictions (**limited write mode**)?
- 03** **Expert project**
How to fully share my project (**write mode**)?
- 04** **Modification**
How to modify access rights?
- 05** **Deletion**
How to stop following or delete a project share?

Sharing modes

Depending on your needs, there are 3 types of project sharing:

- [Basic project:](#)

Read-only mode: view CURVES – no synchronization or modification possible

- [Expert project N.1:](#)

Limited write mode: read access + ability to synchronize data
- no access to the configuration tab

Write mode: Full access to the project without limitations

Prerequisites

A project created

Choose the sharing mode
you want

The recipient already
has a FEELBAT
account

If the user has not created a FEELBAT account using the email address you provided, an error message will appear: “user not found”

01. Basic project

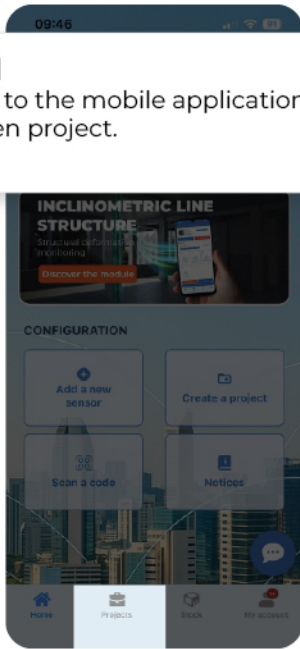

How to share a project in read-only mode?

Share the project in read-only mode

Data visualization

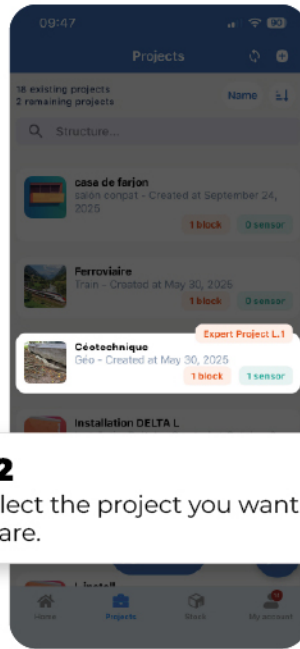

01

Go to the mobile application, then project.

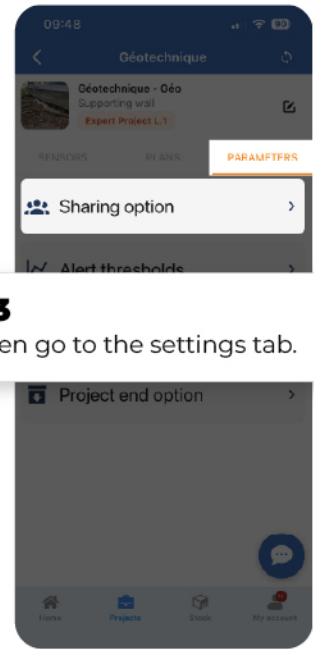

02

Select the project you want to share.

03

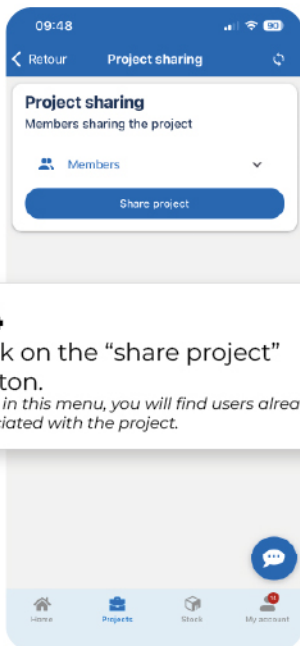

Then go to the settings tab.

04

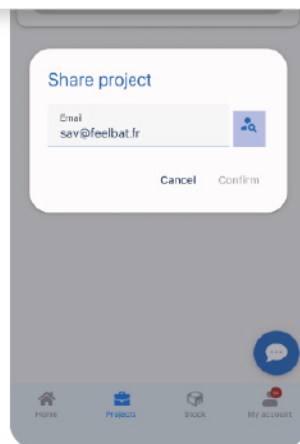

Click on the "share project" button.

Note: in this menu, you will find users already associated with the project.

05

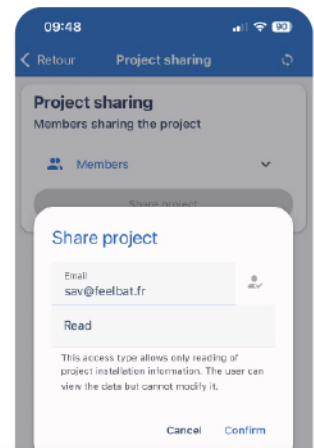

Enter the email of the account you want to associate, click the small blue icon and confirm.

06

Then select "read-only", and confirm.

The recipient will receive a notification and an email informing them of the sharing.

If the user has not created a FEELBAT account with the provided email, an error message will appear: "user not found"

02. Expert Project N.1

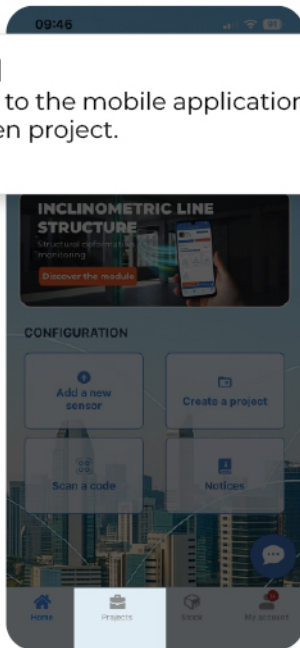

How to share my project with restrictions?

Share the project in limited write mode

Data visualization and synchronization

01

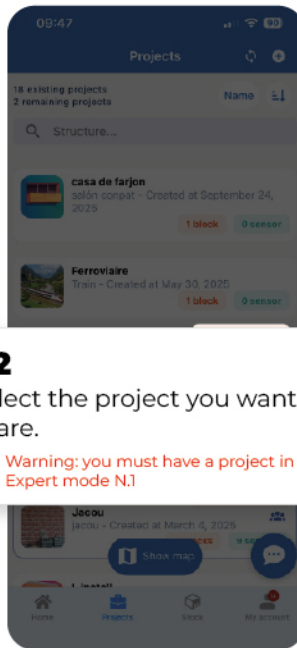

Go to the mobile application, then project.

02

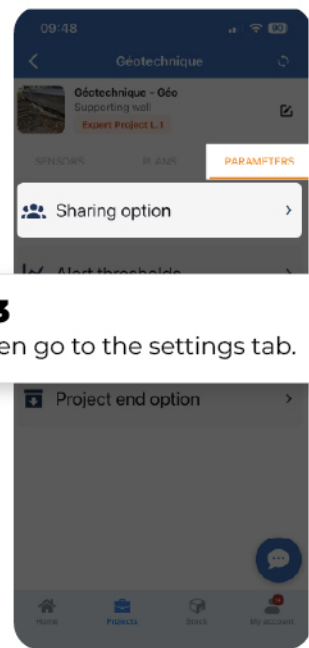

Select the project you want to share.

⚠ Warning: you must have a project in Expert mode N.1

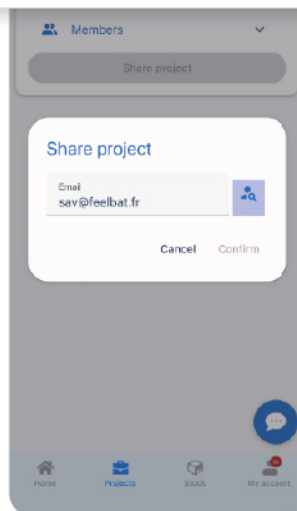

03

Then go to the settings tab.

05

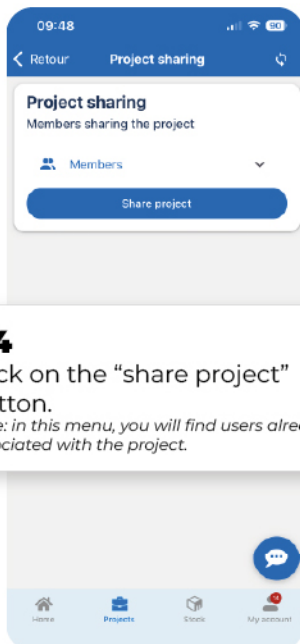

Enter the email of the account you want to associate, click the **blue icon** and confirm.

04

Click on the "share project" button.

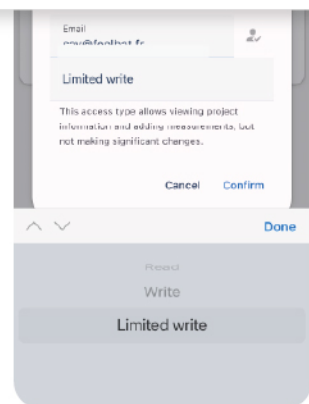

Note: in this menu, you will find users already associated with the project.

06

Click on "read" to choose the desired access level: "limited write", then confirm.

The recipient will receive a notification and an email informing them of the sharing.

** To discover the benefits of Expert Project N.1, click [here](#).

If the user has not created a FEELBAT account with the provided email, an error message will appear: "user not found"

03. Expert Project N.1

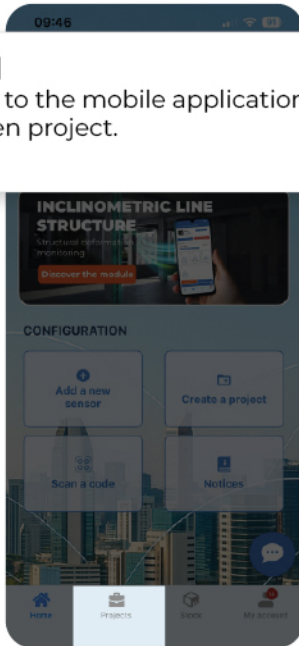

How to fully share my project?

Share the project completely

Access to all features

01

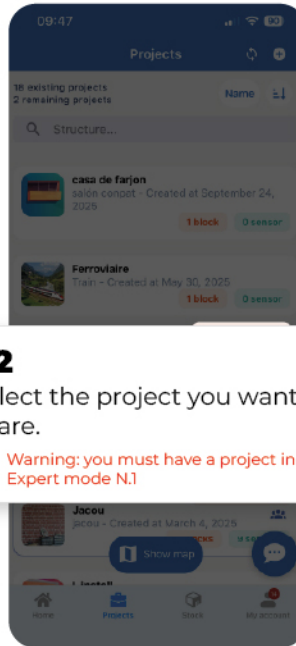

Go to the mobile application, then project.

02

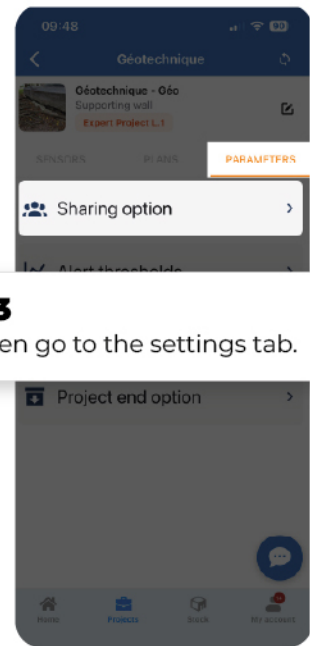

Select the project you want to share.

⚠ Warning: you must have a project in Expert mode N.1

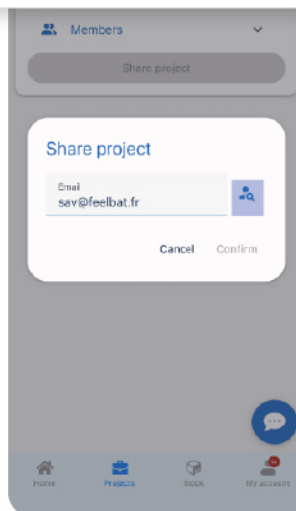

03

Then go to the settings tab.

05

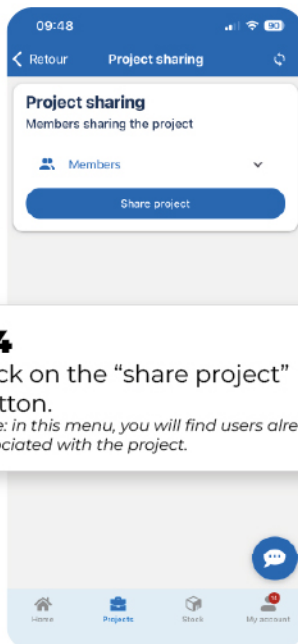

Enter the email of the account you want to associate, click the blue icon and confirm.

04

Click on the "share project" button.

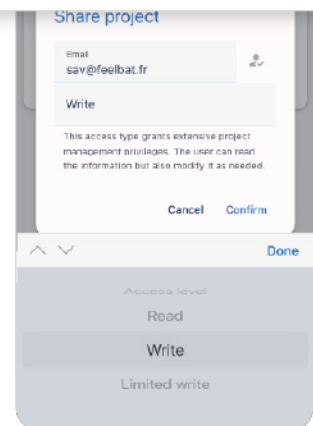

Note: in this menu, you will find users already associated with the project.

06

Click on "read" to choose the desired access level: "write", then confirm.

The recipient will receive a notification and an email informing them of the sharing.

** To discover the benefits of Expert Project N.1, click here.

If the user has not created a FEELBAT account with the provided email, an error message will appear: "user not found"

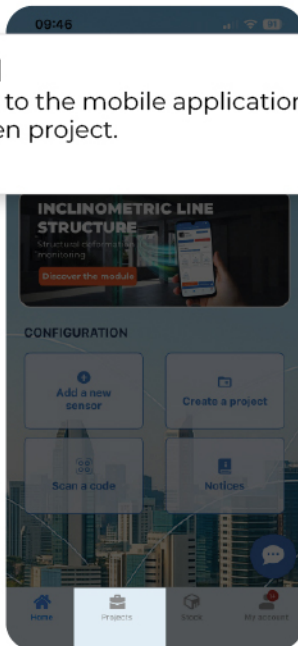

04. Modification

How to modify access rights?

Modify access rights

01

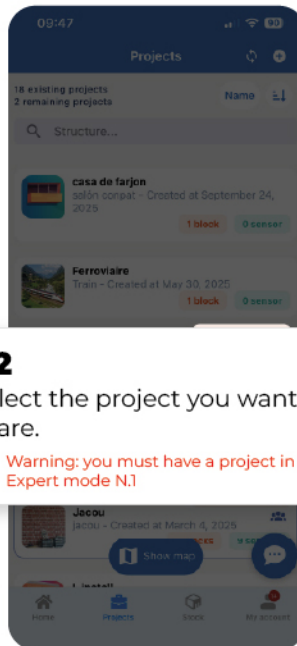

Go to the mobile application, then project.

02

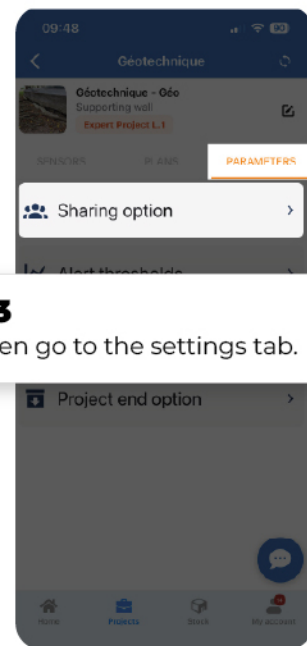

Select the project you want to share.

⚠ Warning: you must have a project in Expert mode N.I

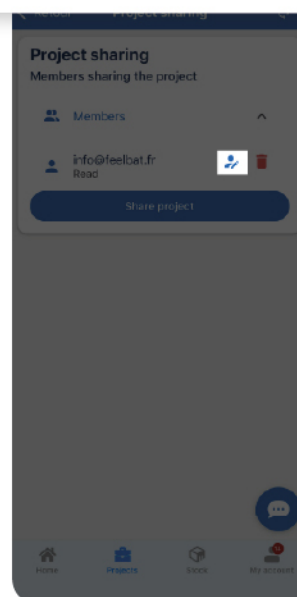

03

Then go to the settings tab.

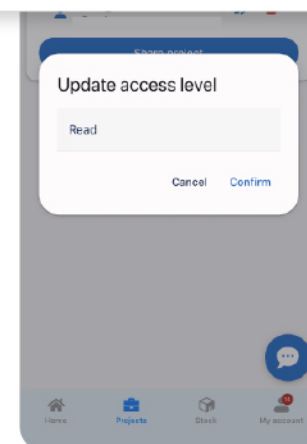

05

Click on the blue icon.

06

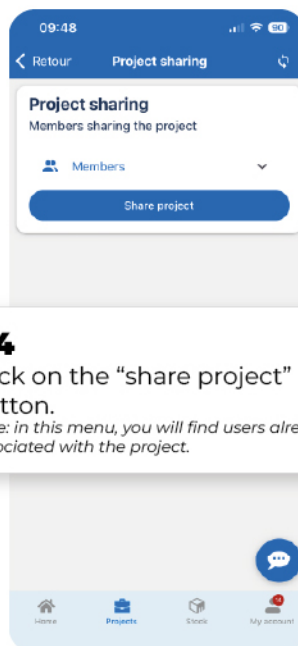

Then modify the access level by selecting it from the dropdown list and click on confirm.

04

Click on the "share project" button.

Note: in this menu, you will find users already associated with the project.

05. Deletion

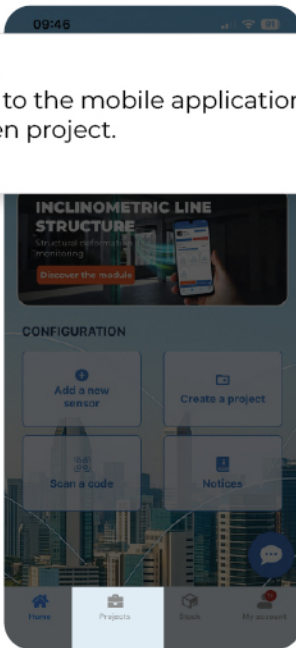

How to stop following or remove project sharing?

Remove project sharing

Project **owner** mobile interface

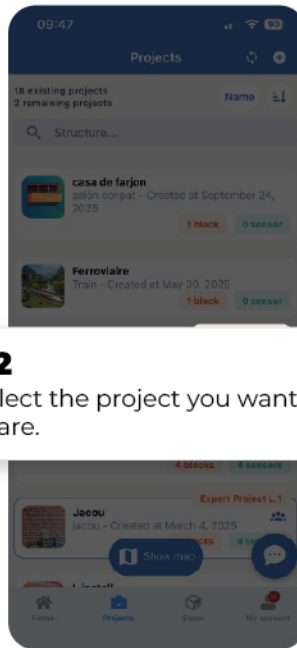

01

Go to the mobile application, then project.

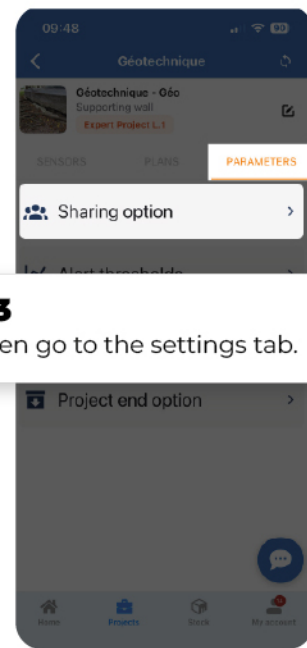

02

Select the project you want to share.

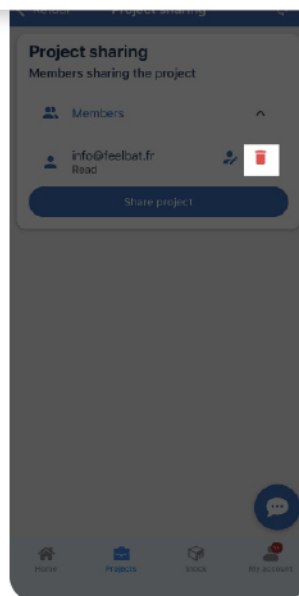

03

Then go to the settings tab.

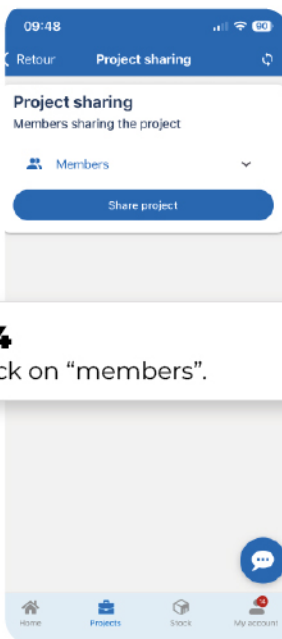

05

Click on the trash icon.

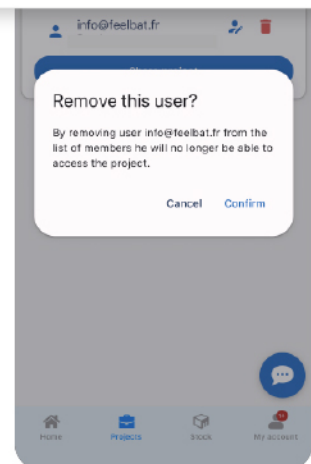

04

Click on "members".

06

Confirm the removal of the user; they will no longer have access to the project.

05. Deletion

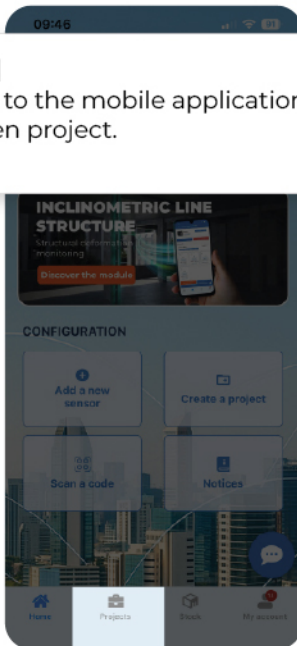

How to stop following or remove project sharing?

Remove project sharing

User mobile interface

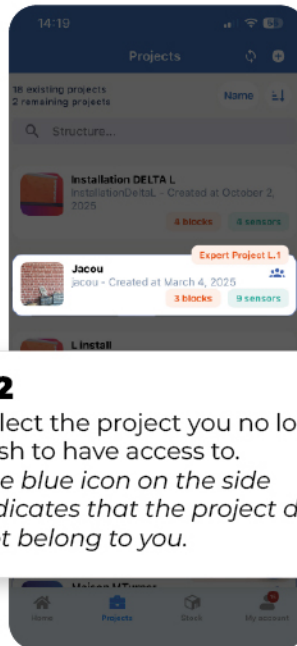

01

Go to the mobile application, then project.

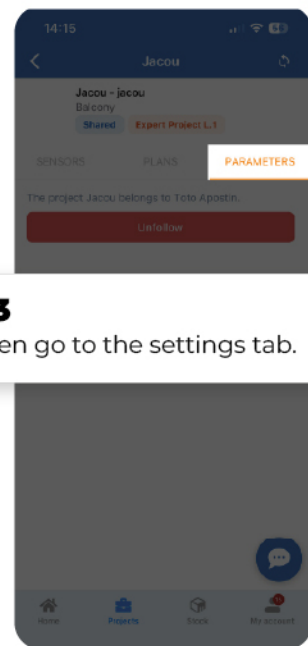

02

Select the project you no longer wish to have access to.
The blue icon on the side indicates that the project does not belong to you.

03

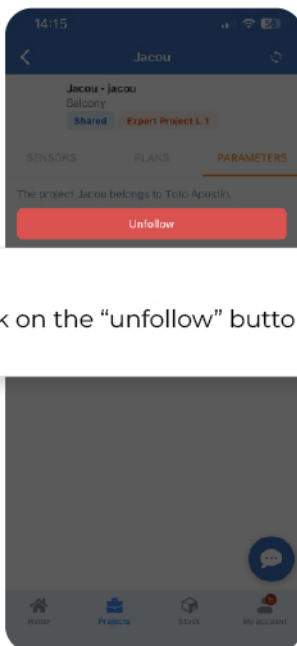

Then go to the settings tab.

To regain access to the project, please request access again from the project owner.

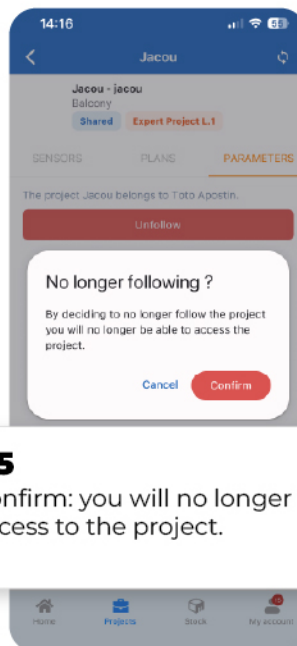

04

Click on the "unfollow" button.

05

Confirm: you will no longer have access to the project.
